DCLase provides excellent clinical results

"...dealing with you and your company has been an absolute pleasure. Your dedication to client satisfaction is beyond compare. The results of laser surgical manipulation in comparison to electrosurgical procedures is beyond belief. The healing is so much faster. There is much less trauma to the tissue. The anesthesia doesn't have to be as profound and the lack of smoke and noxious fumes does much to ease patient fear and increase satisfaction."
 Dr. B. Kruger

GENERAL DENTISTRY
